100 March-April 2021 Forum

On the Cover: A Certified Transport Registered Nurse (CTRN) candidate, an EMT and a paramedic prepare for a COVID patient pickup. Following a year that saw robust (16%) growth in CTRN certification, 2021 marks the 15th birthday of the critical care ground transport credential offered by the Board of Certification for Emergency Nursing (BCEN). (photo courtesy of Kimberly Lacina and MedFleet Ambulance)

TOC description: The Certified Transport Registered Nurse (CTRN) certification, introduced by the Board of Certification for Emergency Nursing (BCEN) on March 31, 2006, signifies mastery of the critical care ground transport nursing body of knowledge. Shown here (L to R) are the original and current CTRN certification seals with the current BCEN logo. (images courtesy of BCEN)

BOARD OF CERTIFICATION FOR EMERGENCY NURSING
Excellence. Achievement. Impact.
